METAMERISMO

Color original
visto con luz "D65"

Visto con luz de día nublado,
se ve igual que el color original

Visto con otra luz, se ve
distinto al color original

HAY METAMERISMO

Nuestros productos, una vez pintados y teñidos, son controlados bajo iluminación D65 (luz de un día con cielo totalmente cubierto).

Cualquier modificación en la iluminación con la que se observen dichos productos, podrá modificar el rendimiento del color, provocando así metamerismo.

Esto hace que un mismo color se vea distinto bajo diferentes tipos de luces.
